DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall contain a full and exact description of the invention, particularly pointing out and distinctly claiming the subject matter which applicant regards as his invention
2. Claims 5,6,12,13,17 and 19 are objected under 35 U.S.C. 112, second paragraph, as being indefinite, since they do not particularly point out and distinctly claim the subject matter which applicant regards as the invention
3. Claims 5,6,12,13,17 and 19 lack the limitation "ABS" in line 2, respectively. There is insufficient basis for this limitation in the claim. If applicant is intending this limitation to be the "anti-lock braking system" then applicant should include this in the specification, not just recite ABS. Furthermore, if applicant intends for phrase ABS to be a limitation, applicant should rewrite ABS to include the full name of ABS.

Claim Rejections

Claims 1-7 are objected to under 35 U.S.C. 175 as being a substantial duplicate of claims 8-13. When two claims in an application are duplicates or else are so close in content that they both could be the same thing, despite a slight difference in wording, it is proper after a full consideration to object to the other as being a substantial duplicate of the claim that is not objected to (see MPEP § 706.03(a)).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Ayres et al (6,404,333).

6. Ayres discloses an instrument cluster comprising: a back plate; a mask, said mask and said back plate formed as a single component. With regards to the method of forming, this is an apparatus product by process claim, therefore the method of forming is not given any patentable weight and a dial formed onto said back plate; an appliqué; a lens. the dial comprises clear polycarbonate; light emitting diode backlighting. (Figs 4-8).

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an

international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

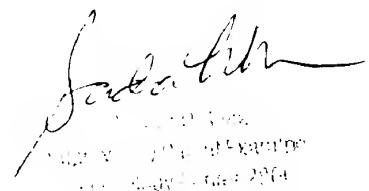

7. Claims 15-18 are rejected under 35 U.S.C. 102(e) as being anticipated by DeLine et al (6,172,613).

8. DeLine discloses the method of producing an instrument cluster in columns 10 and 16, lines 16-25 and 5-17 respectively, the dial comprises clear polycarbonate.
